8     ["AboutMe"]
9     public string Summary = "I am a seasoned Software Engineer with over
10    seven years of experience in the IT industry. I began my career as a manual QA
11    and gradually transitioned into a full-stack developer. My primary expertise is
12    in .NET/C#, complemented by significant experience in JavaScript and
13    TypeScript. Currently, I am broadening my skill set in DevOps, with a focus on
14    cloud computing and containerization technologies. Beyond my professional work,
15    I am passionate about mentoring fellow developers and sharing my knowledge
16    through a technical blog that has attracted a thriving community of several
17    thousand subscribers.";

53     company = "CRM.UA (Nov 2025–current)"
54     description = "As a backend developer, I am responsible for integrating bank
55     services, maintaining the system, fixing bugs, and adding new features to
56     enhance the overall functionality and performance of the software."
57
```

```
58 title = "Teacher, mentor, consultant"
59 company = "CyberBionic Systematics (Jun 2025–current)"
60 description = "As a teacher, I conduct webinars, offer one-on-one lessons, and
61 provide personalized consultations to support each student's learning journey.
62 I monitor attendance and ensure timely completion of homework
63 assignments. In addition, I actively contribute to the development and
64 improvement of the curriculum and teaching methodologies to enhance the overall
65 learning experience."
66
67 title = "Software Engineer"
68 company = "Freelance (May 2025–current)"
69 description = "Various one-time and short-time projects from the whole world.
70 As a developer, I am responsible for identifying and resolving technical
71 issues, as well as designing and implementing new features to enhance product
72 functionality and user experience. I collaborate closely with cross-functional
73 teams to ensure high-quality code, maintain system performance, and
74 continuously improve the software development lifecycle."
75
76 title = "Software Engineer"
77 company = "Document.Online (Jun 2023–Nov 2023)"
78 description = $$The Ukrainian product company of the e-documents flow. As a
79 developer, I played a key role in creating a new project from scratch, building
80 on an existing “mother” project. I was involved in the entire development
81 lifecycle, from architecture design to deployment. In addition, I contributed
82 to three other projects, maintaining existing functionality and developing new
83 features:
84 { Project 1 }: developed and customized UI elements in Angular for specific
85 clients and implemented a graphical document signature feature.
86 { Project 2 }: was dedicated to PDF processing, where migration to modern
87 graphical libraries was implemented and new APIs for new functionality were
88 implemented.
89 { Project 3 }: worked on processing and encryption of electronic signatures,
90 added support for new signature types. In all these projects, I improved the
91 testing infrastructure and implemented innovative solutions to ensure
92 reliability and scalability."
93
94 title = "Software Engineer"
95 company = "EPAM Systems (Jan 2022–Mar 2023)"
96 description = "The world-renowned software development service company as a
97 developer, I was involved in developing a large-scale learning platform in
98 Canada. My primary focus was backend development using .NET, where I enhanced
99 existing functionality and customized features to meet specific customer needs.
100 Working closely with the Canadian team on an outstaffing model, I implemented
101 tools to improve course management and student accounts. This included
102 adding personalized SMS and email notifications for students with the ability
103 to turn them off. I also did extensive bug fixing, code refactoring, and
104 database query optimization to improve performance. I was actively involved in
105 planning sessions, daily standups, and demos to ensure smooth project delivery.
106 In another project, I was involved in developing an e-commerce platform for a
107 clothing retailer. I was involved in both the frontend and backend, improving
108 the store functionality. On the frontend, implemented using Angular, I made
109 significant fixes and improvements to the UI. On the backend, I developed
110 loyalty program features and implemented promo code functionality, which
111 expanded the platform's capabilities for interacting with customers."
112
113 title = "Software Engineer"
114 company = "GlobalLogic (Jul 2021–Dec 2021)"
115 description = "The world-renowned software development service company as
116 a developer, I worked on an intermediary media platform connecting video
117 content creators with online streaming
118 services. My primary responsibility was backend development, where I enhanced
119 existing functionality and introduced
120 new features for the video content management system. I also optimized database
121 performance by maintaining and refining stored procedures to ensure efficient
```

```
122     data handling. The project was based in the US, and I collaborated  
123     as a contractor with the core development team located stateside."  
124  
125     title = ".NET developer"  
126     company = "SmartTender (Nov 201–Jun 2021)"  
127     description = "The Ukrainian product company is developing Prozorro online  
128     auctions. As a developer, I contributed to the development of an online auction  
129     platform that enables users to participate as buyers making bids or as  
130     sellers listing properties for sale. My primary focus was on government  
131     property sales, where I maintained legacy functionality and developed new  
132     auction types. I was actively involved in the platform's migration from a  
133     monolithic architecture to microservices, ensuring a smooth transition and  
134     improved scalability. My  
135     responsibilities included adding and optimizing Elasticsearch filters, fixing  
136     bugs, maintaining unit tests, and enhancing performance metrics. Additionally,  
137     I wrote and optimized SQL scripts to support the platform's evolving  
138     requirements."  
139  
140     title = "Fullstack Angular/.NET developer"  
141     company = "Fernir (Feb 2019–Nov 2019)"  
142     description = "The small service company. As a developer, I have been  
143     developing an educational application that allows tracking students' activity.  
144     I implemented MVP from scratch. I also was involved in different small  
145     projects."  
146  
147     title = "QA tester"  
148     company = "Digivante(Oct 2016–Dec 2018)"  
149     description = "Digivante is a software, website and application testing service  
150     provider that  
151     delivers high-quality, high-coverage, high-speed managed testing services for  
152     retail and ecommerce companies.  
153     As a manual tester, I have been testing various web and mobile applications. I  
154     tested world-renowned brands such as Audi, Burberry, and ASOS and got money  
155     prizes for the most critical bugs."
